

Table of Contents

1	Introduction	1-1
1.1	Overview of the HEC Data Storage System (HEC-DSS)	1-1
1.1.1	Background	1-1
1.1.2	HEC-DSS Contrasted with Other Database Systems	1-2
1.2	General Concepts for HEC-DSS	1-3
1.2.1	Pathnames	1-4
1.2.2	Catalogs	1-5
1.2.3	Data Conventions	1-5
1.2.4	Database File Size	1-6
2	Installing HEC-DSSVue	2-1
2.1	Operating System Requirements	2-1
2.2	Microsoft Windows Installation	2-1
2.2.1	Hardware Requirements	2-1
2.2.2	Installation Procedure	2-2
2.2.3	Uninstall Procedure	2-3
2.3	Sun Solaris Installation	2-3
3	Using HEC-DSSVue: An Overview	3-1
3.1	HEC-DSSVue Main Screen	3-1
3.1.1	Menu Bar	3-2
3.1.2	Tool Bar	3-2
3.1.3	File Name	3-3
3.1.4	Search Boxes	3-3
3.1.5	List of HEC-DSS Pathnames	3-3
3.1.6	Selected Pathnames	3-4
3.1.7	Selection Buttons	3-4
3.2	File Menu Operations	3-5
3.2.1	Opening a HEC-DSS File	3-5
3.2.2	Creating a New HEC-DSS File	3-5
3.2.3	Exiting HEC-DSSVue	3-5
3.3	Edit Menu Operations	3-6
3.3.1	Cutting or Copying and Pasting Records into Another File	3-6
3.3.2	Deleting Records	3-6
3.3.3	Undoing Deletions	3-7
3.3.4	Editing HEC-DSS Data	3-7
3.3.5	Selecting All Pathnames in a HEC-DSS File	3-7
3.4	View Menu Operations	3-8
3.4.1	Choosing a Display Mode for HEC-DSS Pathnames	3-8
3.4.2	Refreshing the Catalog	3-9

3.4.3	Searching and Filtering HEC-DSS Pathnames	3-9
3.4.4	Searching Pathname Strings.....	3-9
3.4.5	Filtering HEC-DSS Pathnames by Parts	3-9
3.5	Selecting Pathnames	3-10
3.5.1	De-Selecting Pathnames.....	3-10
3.5.2	Setting the Time Window	3-11
3.6	Visualizing HEC-DSS Data with Plots and Tables	3-12
3.7	Utilities Menu Operations	3-13
4	Utilities	4-1
4.1	Viewing Tabular Data	4-1
4.1.1	Accessing Tables.....	4-2
4.1.2	Customizing the Display of Tabular Data.....	4-2
4.2	Editing Tabular Data	4-2
4.2.1	Selecting Table Cells.....	4-3
4.2.2	Cutting and Pasting Data.....	4-3
4.2.3	Copying and Pasting Data.....	4-3
4.2.4	Clearing Table Cells.....	4-4
4.2.5	Appending Rows.....	4-4
4.2.6	Deleting Rows.....	4-4
4.3	Printing, Copying, and Exporting Tables	4-4
4.3.1	Printing Tables	4-4
4.3.2	Exporting Tables	4-6
4.3.3	Copying Tables to the Clipboard for Use in Other Applications	4-7
4.4	Entering Data Manually	4-8
4.4.1	Entering Time Series Data Manually	4-8
4.4.2	Entering Paired Data Manually	4-9
4.5	Renaming HEC-DSS Data in HEC-DSSVue	4-11
4.6	Copying Records into a HEC-DSS File	4-11
4.7	Duplicating Records	4-12
4.8	Merging HEC-DSS Files	4-13
4.9	Squeezing HEC-DSS Files	4-13
4.10	Scripting	4-15
4.12	Performing Math Functions	4-16
5	Customizing Plots	5-1
5.1	Customizing Plots: Overview	5-2
5.2	Using Plot Editors	5-3
5.2.1	Setting Defaults vs. Customizing Individual Plots.....	5-3
5.2.2	Accessing Editors.....	5-4

5.3	Recognizing Plot Editors and Tools	5-5
5.3.1	Plot Properties Editor.....	5-5
5.3.2	Individual Plot Property Editors.....	5-6
5.3.3	Configure Plot Editor.....	5-7
5.3.4	Default Line Style Options Editor.....	5-8
5.3.5	Default Plot Properties Editor.....	5-9
5.4	Customizing Plot Titles	5-10
5.5	Customizing Curves	5-11
5.5.1	Customizing Curves in Individual Plots.....	5-11
5.5.2	Specifying Parameter-Based Default Curve Styles.....	5-12
5.5.3	Specifying Line and Point Styles of Curves.....	5-14
5.5.4	Customizing Curve Labels.....	5-16
5.5.5	Customizing Curve Quality Symbols.....	5-17
5.6	Customizing Viewport Properties	5-17
5.6.1	Customizing Viewport Borders and Background.....	5-18
5.6.2	Customizing Viewport Gridlines.....	5-19
5.7	Adding and Customizing Marker Lines	5-20
5.7.1	Adding Markers.....	5-20
5.7.2	Deleting Markers.....	5-21
5.7.3	Customizing Markers.....	5-21
5.7.4	Editing Callouts.....	5-23
5.8	Customizing Axes	5-24
5.8.1	Changing Axis Type.....	5-24
5.8.2	Specifying Axis Scale.....	5-24
5.8.3	Modifying Tic Marks.....	5-26
5.8.4	Customizing Axis Labels.....	5-27
5.9	Customizing Legends	5-28
5.10	Customizing Window Panels	5-29
5.10.1	Customizing the Panel Background Color.....	5-30
5.10.2	Customizing the Legend Layout.....	5-30
5.10.3	Customizing the Horizontal Spacer Size.....	5-31
5.11	Customizing Plot Layout	5-31
5.11.1	Adding and Removing Viewports.....	5-32
5.11.2	Setting Viewport Weights.....	5-33
5.11.3	Adding and Removing Axes.....	5-33
5.11.4	Arranging Viewports and Axes.....	5-34
5.11.5	Reversing Axes.....	5-34
5.12	Exporting and Importing Templates	5-34
5.13	Additional Viewing Options for Plots	5-36
5.13.1	Viewing Data in Tabular Form.....	5-36
5.13.2	Saving Plots.....	5-37
5.13.3	Copying Plots to the Clipboard.....	5-37
5.14	Printing Plots	5-38

6	Math Functions	6-1
6.1	The Math Functions Screen	6-1
6.1.1	Menu Bar	6-2
6.1.2	Menu Bar Buttons	6-2
6.1.3	Other Math Features of the Math Functions Screen	6-2
6.2	Managing Data	6-3
6.2.1	Selecting Paired Data Curves for Function Operations	6-4
6.3	Arithmetic Functions	6-6
6.3.1	Add	6-6
6.3.2	Subtract	6-7
6.3.3	Multiply	6-8
6.3.4	Divide	6-9
6.3.5	Exponentiation	6-10
6.3.6	Absolute Value	6-10
6.3.7	Square Root	6-11
6.3.8	Log	6-11
6.3.9	Log Base 10	6-12
6.3.10	Sine	6-12
6.3.11	Cosine	6-13
6.3.12	Tangent	6-13
6.3.13	Inverse	6-14
6.3.14	Accumulation	6-14
6.3.15	Successive Differences	6-15
6.3.16	Time Derivative	6-15
6.4	General Functions	6-16
6.4.1	Units Conversion	6-16
6.4.2	Round to Nearest Whole Number	6-17
6.4.3	Truncate to Whole Number	6-18
6.4.4	Round Off	6-18
6.4.5	Estimate Missing Values	6-19
6.4.6	Screen Using Minimum and Maximum	6-20
6.4.7	Screen with Forward Moving Average	6-20
6.4.8	Merge Time Series	6-21
6.4.9	Merge Paired Data	6-22
6.4.10	Generate Data Pairs	6-22
6.5	Time Conversion Functions	6-23
6.5.1	Transform to Regular	6-24
6.5.2	Snap Irregular to Regular	6-26
6.5.3	Transform to Irregular	6-28
6.5.4	Shift in Time	6-30
6.5.5	Extract Time Series	6-30
6.5.6	Interpolate at Regular Intervals	6-33
6.6	Hydrologic Functions	6-34
6.6.1	Muskingum Routing	6-34
6.6.2	Straddle Stagger Routing	6-35
6.6.3	Modified Puls Routing	6-35
6.6.4	Rating Table	6-36

6.6.5	Reverse Rating Table.....	6-37
6.6.6	Two Variable Rating Table	6-37
6.6.7	Decaying Basin Wetness	6-40
6.6.8	Shift Adjustment.....	6-40
6.6.9	Period Constants	6-41
6.6.10	Multiple Linear Regression	6-42
6.6.11	Regression	6-43
6.6.12	Conic Interpolation	6-44
6.6.13	Polynomial	6-46
6.6.14	Polynomial with Integral	6-47
6.6.15	Flow Accumulator Gage Processor	6-47
6.7	Smoothing Functions	6-49
6.7.1	Centered Moving Average.....	6-49
6.7.2	Olympic Smoothing Average	6-50
6.7.3	Forward Moving Average.....	6-51
6.8	Statistics Functions	6-53
6.8.1	Basic	6-53
6.8.2	Linear Regression.....	6-55
6.8.3	Cyclic Analysis.....	6-56
7	Scripting	7-1
7.1	Executing Scripts	7-1
7.1.1	Script Selector.....	7-1
7.2	Script Browser	7-2
7.2.1	Menu Bar	7-3
7.2.2	Editor Panel	7-4
7.2.3	Tree Hierarchy	7-5
7.3	Scripting Basics	7-5
7.3.1	Outputting Text.....	7-6
7.3.2	Data Types	7-6
7.3.3	Variables	7-8
7.3.4	Operators.....	7-9
7.3.5	Comments.....	7-9
7.3.6	Program Lines.....	7-9
7.3.7	Conditional Expressions	7-11
7.3.8	Looping	7-12
7.3.8.1	Conditional Looping.....	7-12
7.3.8.2	Iterative Looping	7-12
7.3.9	Defining and Using Functions	7-13
7.3.10	Modules, Functions and Object Methods	7-14
7.3.11	Handling Exceptions.....	7-15
7.4	Displaying Messages	7-17
7.4.1	Displaying a Message Dialog	7-17
7.5	Reading and Writing to HEC-DSS Files	7-18
7.5.1	DSS Class	7-18
7.5.2	DSSfile Objects	7-19

7.6	Display Objects	7-19
7.7	Plotting Basics	7-20
7.7.1	Plot Class	7-20
7.7.2	Changing Plot Component Attributes	7-21
7.7.3	G2dDialog Objects	7-22
7.7.4	Viewport Objects	7-24
7.7.5	Axis Objects	7-28
7.7.6	Axis Tics Objects	7-32
7.7.7	G2dLine Objects	7-33
7.7.8	G2dLabel and AxisLabel Objects	7-36
7.7.9	G2dTitle Objects	7-39
7.7.10	Templates	7-40
7.8	Plot Component Properties	7-41
7.8.1	Colors	7-41
7.8.2	Alignment	7-41
7.8.3	Rotation	7-41
7.8.4	Fill Patterns	7-42
7.8.5	Fill Style	7-42
7.8.6	Line Styles	7-42
7.8.7	Step Style	7-42
7.9	Tables	7-43
7.9.1	Tabulate Class	7-43
7.9.2	TableFrame Objects	7-43
7.10	Math Functions	7-45
7.10.1	Absolute Value	7-45
7.10.2	Accumulation (Running)	7-45
7.10.3	Add a Constant	7-46
7.10.4	Add a Data Set	7-46
7.10.5	Apply Multiple Linear Regression Equation	7-47
7.10.6	Centered Moving Average Smoothing	7-49
7.10.7	Conic Interpolation from Elevation/Area Table	7-50
7.10.8	Convert Values to English Units	7-51
7.10.9	Convert Values to Metric (SI) Units	7-52
7.10.10	Correlation Coefficients	7-52
7.10.11	Cosine Trigonometric Function	7-53
7.10.12	Cyclic Analysis (Time Series)	7-54
7.10.13	Decaying Basin Wetness Parameter	7-55
7.10.14	Divide by a Constant	7-55
7.10.15	Divide by a Data Set	7-56
7.10.16	Estimate Values for Missing Precipitation Data	7-56
7.10.17	Estimate Values for Missing Data	7-57
7.10.18	Exponentiation Function	7-57
7.10.19	Extract Time Series Data at Unique Time Specification	7-58
7.10.20	Flow Accumulator Gage (Compute Period Average Flows)	7-60
7.10.21	Forward Moving Average Smoothing	7-61
7.10.22	Generate Data Pairs from Two Time Series	7-61
7.10.23	Generate a Regular Interval Time Series	7-62

7.10.24	Get Data Container	7-63
7.10.25	Get Data Type for Time Series Data Set	7-64
7.10.26	Get Units Label for Data Set	7-64
7.10.27	Interpolate Time Series Data at Regular Intervals	7-64
7.10.28	Inverse (1/X) Function.....	7-66
7.10.29	Determine If Data Is in English Units	7-66
7.10.30	Determine If Data Is in Metric Units	7-66
7.10.31	Determine If Computation Stable for Given Muskingum Routing Parameters.....	7-67
7.10.32	Last Valid Value's Date and Time.....	7-68
7.10.33	Last Valid Value in a Time Series	7-68
7.10.34	Linear Regression Statistics.....	7-68
7.10.35	Natural Log, Base "E" Function.....	7-69
7.10.36	Log Base 10 Function.....	7-69
7.10.37	Maximum Value in a Time Series	7-69
7.10.38	Maximum Value's Date and Time.....	7-70
7.10.39	Mean Time Series Value	7-70
7.10.40	Merge Paired Data Sets	7-70
7.10.41	Merge Two Time Series Data Sets	7-71
7.10.42	Minimum Value in a Time Series.....	7-71
7.10.43	Minimum Value's Date and Time	7-71
7.10.44	Modified Puls Or Working R&D Routing Function	7-72
7.10.45	Multiple Linear Regression Coefficients	7-72
7.10.46	Multiply by a Constant	7-74
7.10.47	Multiply by a Data Set.....	7-74
7.10.48	Muskingum Hydrologic Routing Function.....	7-74
7.10.49	Number of Missing Values in a Time Series.....	7-75
7.10.50	Number of Valid Values in a Time Series.....	7-75
7.10.51	Olympic Smoothing.....	7-76
7.10.52	Period Constants Generation	7-77
7.10.53	Polynomial Transformation	7-78
7.10.54	Polynomial Transformation with Integral.....	7-78
7.10.55	Rating Table Interpolation.....	7-79
7.10.56	Reverse Rating Table Interpolation	7-80
7.10.57	Round To Nearest Whole Number	7-80
7.10.58	Round Off to Specified Precision	7-81
7.10.59	Screen for Erroneous Values Based on Forward Moving Average	7-82
7.10.60	Screen for Erroneous Values Based on Maximum/Minimum Range.....	7-83
7.10.61	Select a Paired Data Curve by Curve Label	7-85
7.10.62	Select a Paired Data Curve by Curve Number	7-85
7.10.63	Set Data	7-86
7.10.64	Set Location Name for Data Set	7-87
7.10.65	Set Parameter for Data Set.....	7-87
7.10.66	Set Pathname for Data Set	7-87
7.10.67	Set Time Interval for Data Set.....	7-88
7.10.68	Set Data Type for Time Series Data Set.....	7-88
7.10.69	Set Units Lable for Data Set	7-88
7.10.70	Set Version Name for Data Set.....	7-89
7.10.71	Set Watershed name for Data Set	7-89
7.10.72	Shift Adjustment of Time Series Data	7-89
7.10.73	Shift Time Series in Time.....	7-90
7.10.74	Sine Trigonometric Function	7-91

7.10.75 Skew Coefficient.....	7-91
7.10.76 Snap Irregular Times to Nearest Regular Period.....	7-91
7.10.77 Square Root.....	7-93
7.10.78 Standard Deviation of Time Series	7-93
7.10.79 Straddle Stagger Hydrologic Routing	7-93
7.10.80 Subtract a Constant	7-94
7.10.81 Subtract a Data Set.....	7-94
7.10.82 Successive Differences for Time Series.....	7-95
7.10.83 Sum Values in Time Series	7-95
7.10.84 Tangent Trigonometric Function	7-95
7.10.85 Time Derivative (Difference Per Unit Time).....	7-96
7.10.86 Transform Time Series to Regular Interval.....	7-96
7.10.87 Transform Time Series to Irregular Interval	7-98
7.10.88 Truncate to Whole Numbers	7-99
7.10.89 Two Variable Rating Table Interpolation	7-100

List of Tables

Table 7.1: MessageBox Functions	7-17
Table 7.2: DSSFile Functions	7-19
Table 7.3: G2dDialog Object Methods	7-22
Table 7.4: Viewport Object Methods	7-24
Table 7.5: Axis Object Methods	7-28
Table 7.6: Axis Tics Object Methods	7-32
Table 7.7: G2dLine Object Methods	7-33
Table 7.8: Label Object Methods	7-36
Table 7.9: G2dTitle Object Methods	7-39
Table 7.10: Standard Color Names	7-41
Table 7.11 Alignment Values	7-41
Table 7.12 Rotation Values	7-41
Table 7.13 Fill Patterns	7-42
Table 7.14 Fill Values	7-42
Table 7.15 Line Style Values	7-42
Table 7.16 Step Style Values	7-42
Table 7.17 TableFrame Object Methods	7-43
Table 7.18 Valid time Level String and range String Values	7-58

List of Examples

Example 1: Outputting Text	7-6
Example 2: Variable Types	7-7
Example 3: Sequence Indexing and Slicing	7-8
Example 4: Assigning Values to Variables	7-8
Example 5: Input vs. Program Lines	7-10
Example 6: Input Line Grouping.....	7-10
Example 7: Conditional Expressions.....	7-11
Example 8: Simple Conditional Expressions	7-11
Example 9: Conditional Looping	7-12
Example 10: Iterative Looping.....	7-13
Example 11: Defining And Using Functions	7-14
Example 12: Using A Function From An Imported Module.....	7-15
Example 13: Exception Handling.....	7-16
Example 14: Display Error Dialog.....	7-18
Example 15: Display OK/Cancel Dialog	7-18
Example 16: Opening a DSS File.....	7-18
Example 17: Reading a DSS Data Set.....	7-19
Example 18: Creating a Display Object	7-19
Example 19: Creating a Plot.....	7-20
Example 20: Plotting DSS Data	7-21
Example 21: Plot Dialog	7-24
Example 22: Viewport Objects	7-28
Example 23: Using Axis Objects	7-31
Example 24: Using Axis Tics Objects.....	7-33
Example 25: Using G2dLine Objects.....	7-36
Example 26: Using Axis Label Objects	7-38
Example 27: Using G2dTitle Objects.....	7-39
Example 28: Applying Template Saved in Default Director	7-40
Example 29: Creating a Table	7-43
Example 30: Filling and Displaying a Table	7-44

Forward

The U.S. Army Corps of Engineers' Hydrologic Engineering Center Data Storage System, or HEC-DSS, is a database system designed to efficiently store and retrieve scientific data that is typically sequential. Such data types include, but are not limited to, time series data, curve data, spatial-oriented gridded data, textual data (such as this manual), and others. The system was designed to make it easy for users and application programs to retrieve and store data. HEC-DSSVue (HEC-DSS Visual Utility Engine) is a graphical user interface program for viewing, editing, and manipulating data in HEC-DSS database files.

HEC-DSS originated at the Hydrologic Engineering Center in 1979 under the direction of Dr. Art Pabst. Since that time, many have worked on the development of the HEC-DSS software and the HEC-DSS utility programs, including William Charley, Al Montalvo, Carl Franke, Paul Ely, Robert Carl, Dennis Huff, and numerous others. Mr. William Charley, leader of the software development team, designed HEC-DSSVue. Resource Management Associates (RMA) of Fairfield, California, under the direction of Dr. John DeGeorge, aided in the development of the user interface. Mr. Darryl Davis was the Director of HEC during the development of this software.
