

HEC-1 VERSION 4.1 – ADDENDUM

<u>Page</u>	<u>Revisions</u>
A-7	On the field 4, the variable NQ represents the “Integer number of hydrograph ordinates to be computed (<u>300 maximum</u>)”. The HEC 1 program version 4.1 has been revised to allow NQ to have a <u>maximum of 2000</u> hydrograph ordinates.
11	On Table 3.2, the column heading under “Duration” has been revised to have units in “ <u>minutes</u> ” instead of “ <u>hours</u> ”.
29	The text above equation (3.54) reads “If R is <u>less</u> than unity then the “conservation” form of the finite difference equation applies:” and has been revised to “If R is <u>greater than or equal</u> to unity then the “conservation” form of the finite difference equation applies.”
